Russell Springs, KY 42642

To whom it may concern:

ADC Manufacturing produces aluminum die cast and pressed steel chain link fence fittings for the Fence Industry.

ADC uses secondary aluminum ingots that are made of 100% recyclable aluminum scrap.

ADC uses hot and cold rolled steel coils processed by steel mini-mills of which the finished steel make up would be 95% to 100% recyclable scrap metal. ADC also uses steel from suppliers that furnish steel coils from integrated mills that restricts the usage of scrap steel to no more than 25% to 30% in their process.

In accordance with SRI both methods of steel production are both economically and environmentally beneficial to the combined infrastructure of the steelmaking process, product generation, scrap generation and the recycling of steel scrap.

Respectfully,
Mike Marley
Nat. Sales Mgr.
