

Wheatland Tube Company

DIVISION OF JOHN MANEELY COMPANY

The pipe and tube products manufactured by Wheatland Tube Company for fence framework are produced from approximately 25% to 85% recycled steel. The amount can vary depending on the steel vendor.

Of the 25 to 85% recycled steel approximately 30% is post-industrial and 70 % is post-consumer depending on fluctuating scrap prices.

The American Iron and Steel Institute (AISI) website states: “Steel’s recycling rate of 66% is far higher than that of any other material capturing twice as much tonnage as all other materials combined.”
