

S.P.S.V.™ Color Fencing System

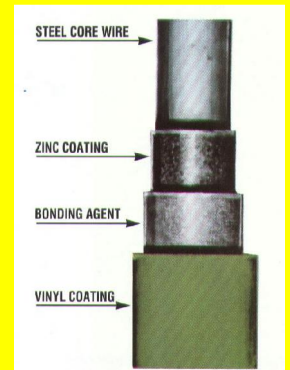

Mini Mesh Security Fencing

Join the growing trend in chainlink fencing: P.V.C. coated mini mesh fabric, framework, and fittings from Stephens Pipe and Steel. Manufactured to exacting specifications, our vinyl coated system is thermally bonded to all galvanized fencing components. Combining the strength and security of mini mesh chainlink fabric with the durability and appeal of vinyl coating, our product emerges from manufacturing with a smooth, glossy finish that resists corrosion, while providing a non-climbable fence that is nearly impossible to cut.

SPSV FABRIC

Stephens Pipe and Steel's vinyl coated fabric meets or exceeds the requirements of ASTM 668-96. It is available in Extruded (Class 1A), Extruded and Bonded (Class 2A), and Fused and Bonded (Class 2B). Four standard colors are available: Ensor Green, Woodland Green, Brown, and Black. Custom colors can be produced but are quoted on a "per job" basis. A wide variety of Meshes, including 3/8", 1/2", 5/8", 1", 1-1/4", and 1-1/2" are available. Call for a prompt quotation.

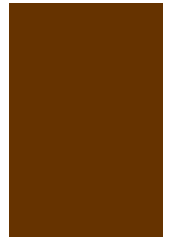

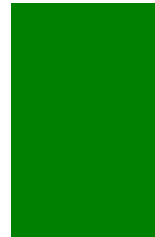

SPSV Framework and Accessories

After a thorough cleaning, our framework materials are primed and then P.V.C. coated to meet the most rigid government and A.S.T.M. specifications. Our industrial grade of vinyl framework is available in Schedule 40, SS 40 and 20 type products, and Structural weight pipe. Of course a wide variety of O.D.s and Gauges can be coated to meet your needs. All of our hardware items are primed and the coated in accordance with ASTM 626. Available in Ensor Green, Woodland Green, Brown, and Black, other non-stock colors are available.
