## Centurion is STEEL Strong

**Thermally-Bonded DuraLast™ Finish Ensures Against Corrosion**

Each Centurion component is formed from high-quality carbon steel, which is subjected to hot-dipped galvanized coating for corrosion resistance. A layer of phosphate prepares the galvanized steel for the DuraLast finish, applied electrostatically and thermally bonded after fabrication, ensuring that all welds and joints are fully protected. The result is a fence that requires no maintenance and carries a 12-year warranty.
